Subject: RE: how did your Climax trip go - will you write up trip reports

Hi Toney,

I thought the field visit went well, and very much appreciated Julia and Billy's input and assistance. Sue Nall and Mike Finan, our wetlands subject matter expert, also assisted with the field review. Sue and I had an informative meeting on Friday morning with Sarah Fowler and the Mine to review the proposed project and permit process.

I will be sending Corps/EPA combined comments and questions to the Mine. I'm not planning to do a separate trip report, but will copy you and Julia on follow-up correspondence with the Mine. Julia indicated she will send me her written notes from the field visit, as well as information for the jurisdictional determination. My plan is to compile everyone's field notes and send them to the Mine in a single document.

I would like to send all comments/questions that will require additional field data collection to the Mine as soon as possible, probably in advance of providing comments on the WD report, so that additional field work can be completed within the next couple of weeks. Given the elevation of the Mine, their field season is almost over for the year.

Julia -- will you be able to provide your notes that may require additional field data collection to me within the next week or so?

Thanks,

Lesley

How do you feel the visit went? Will the Corps staff write up trip reports in addition to the delineation information? I heard that Julia will send a summary after she returns to the office this week.
